Rita Moreira

Richardson, TX | ritasfmoreira@outlook.com | linkedin.com/in/ritasfmoreira

MS Business Analytics & AI candidate at UT Dallas with nearly two years in HR and retail operations: improving workflows, analyzing operational data and translating complex business needs into practical solutions.

EDUCATION

The University of Texas at Dallas **Expected Aug 2027**
Master of Science, Business Analytics and Artificial Intelligence (STEM-designated) *Richardson, TX*
GPA 3.88 | Analytics Excellence Scholarship

University of Porto **Jul 2024**
Bachelor's Degree, Applied Languages in Business Relations | GPA 3.8 *Porto, Portugal*

SKILLS & CERTIFICATIONS

Technical Skills: SQL, Excel (Power Query, PivotTables, Solver), Power BI, Python, R, Tableau, Microsoft Fabric, SAP, ServiceNow, Git/GitHub
Certifications: Microsoft Power BI Data Analyst, Google Data Analytics, Meta Python Data Analytics
Languages: Portuguese (native), English (fluent, C2), French (B2), Spanish (B2)

PROFESSIONAL EXPERIENCE

HR Operations Analyst (People Services) **Aug 2024 – Jan 2026**
ALTEN *Portugal*

- Managed HR operations for a changing employee population of up to ~1,200 people, consistently meeting SLAs in a high-volume, deadline-driven environment while maintaining data accuracy and service quality.
- Supported the integration of a 700-employee acquired company by analyzing differences in HR processes, employee records, and benefits and collaborating with cross-functional teams to align operational practices with ALTEN standards.
- Built Excel KPI dashboards using PivotTables and trend analysis to track SLA compliance and backlog across approximately 3,000 monthly tickets, contributing to a 15% reduction in repeat tickets.

Operations Data Analyst **May 2024 – Aug 2024**
Intermarché *Portugal*

- Built a Power BI dashboard combining inventory risk, on-shelf availability, and promotion performance, enabling section managers to identify priority products before placing orders.
- Conducted an inventory audit across 10,000+ SKUs and implemented structured cycle counts, improving the reliability of data used for replenishment and ordering decisions.
- Designed an automated order-recommendation prototype that evaluated demand, current inventory, and supplier constraints, while incorporating a four-step manager approval workflow.

ACADEMIC PROJECTS

Airline Merger Data Platform & Integration Architecture **Fall 2026**
BUAN 6335: Organizing for Business Analytics Platforms, UT Dallas

- Designed an Azure Databricks platform to merge two airlines' data systems (1,300 daily flights) and replace overnight batch reports with real-time data in under 30 seconds.
- Built a phased integration plan to unify 34M loyalty accounts within antitrust and privacy rules, projecting ~$100M/yr in AI-driven value from the combined data.

Fleet Driver Risk Analytics – Hadoop & Power BI **Fall 2026**
BUAN 6346: Big Data, UT Dallas

- Built a Hadoop pipeline (Hive, Pig, Impala) and Power BI dashboard scoring safety risk for a 25-driver fleet from 9,400+ telematics records, flagging 7 drivers above the alert threshold.
- Developed Python models (Bayesian forecast, K-Means, random forest at 0.90 AUC) showing only 4 of 7 flagged drivers were reliably high-risk and that risk tracked the driver, not the truck.

LEADERSHIP EXPERIENCE

Graduate Teaching Assistant | Career Management Center Assistant **Aug 2026 – Present**
UT Dallas *Richardson, TX*

- Facilitate learning for 60 graduate students across two courses by providing timely feedback, communicating expectations clearly, and tracking attendance and weekly assignments with consistency.
- Coach 50+ students through resumes, elevator pitches, and interview preparation, tailoring feedback to individual goals and helping them communicate their strengths with confidence.
